Family Support Program

Support Services for Families with Children

Exploring your options and supporting your decisions.

Program Overview

The Family Support Program is a service providing intensive Family supports to families and individuals as contracted by The Ministry of Social Services and Sun Country Health Region's Child and Youth Program.

It is Envision's belief that when families are given support, education, and resources, they are able to recognize and build on their strengths. The emphasis is on maintaining the family unit by providing supportive services that strengthen the entire family.

Referrals to these programs come directly from the agencies that fund them.

“Feelings of worth can flourish only in an atmosphere where individual differences are appreciated, mistakes are tolerated, communication is open, and rules are flexible - the kind of atmosphere that is found in a nurturing family.”

Virginia Satir

Family Support Program

Family Support Programs are administered by community-based organizations such as Envision Counselling and Support Centre. Each program has a Coordinator who is responsible for the administration and staffing. Family Support Workers are employees of Envision, not the Ministry of Social Services (MSS), or the Health District.

When a Social Worker from MSS determines that an Family Support Worker is the best intervention for a family, a request for services is made by MSS to Envision's Family Support Program Coordinator, who then assigns a Family Support Worker to work with the family.

The Family Support Program supports the healthy development of families and children so they may achieve their full potential. The Family Support Program is a service providing intensive in-home support to children and families who are receiving family and youth services. The emphasis is on maintaining the family unit by providing a variety of supportive services which prevent the children's admission to care. Services are intended to be time-limited and outcome orientated.

The Family Support Worker begins by developing a relationship of trust with the family and then to act as mentor and consultant. The Family Support Worker encourages the parent to make healthy changes which are positive for themselves and their families. Contracts are to be reviewed every three months and a new contract with the family may be made.

Referrals to this program come directly from the Ministry for Social Services.

Child and Youth Program

The Child and Youth Program is a program that is contracted through Sun Country Health Region's Mental Health Services (Child and Youth Program). Families are offered Family support for assistance with children under 18 years of age with emotional, behavioural, or adjustment difficulties. These children are receiving individual, group and/or family counselling services from Mental Health.

Envision Family Support Workers are contracted to provide Family services to clients of the Child and Youth Program. Once a contract is received for services from Mental Health, an Envision Family Support Worker is contracted to provide in-home support to the family on a weekly basis, usually for three months.

The program is client-centered, individualized, and flexible to meet the specific needs of each family. Program activities will take place in the community and in the family's home.

Referrals to this program come directly from Mental Health's Child and Youth Program.
